A. Karma exists and has an effect upon our lives. We reap what we sow. That which we do to others, we will eventually experience being done to ourselves in some form, regardless of whether or not that experience is brought about by other human beings.

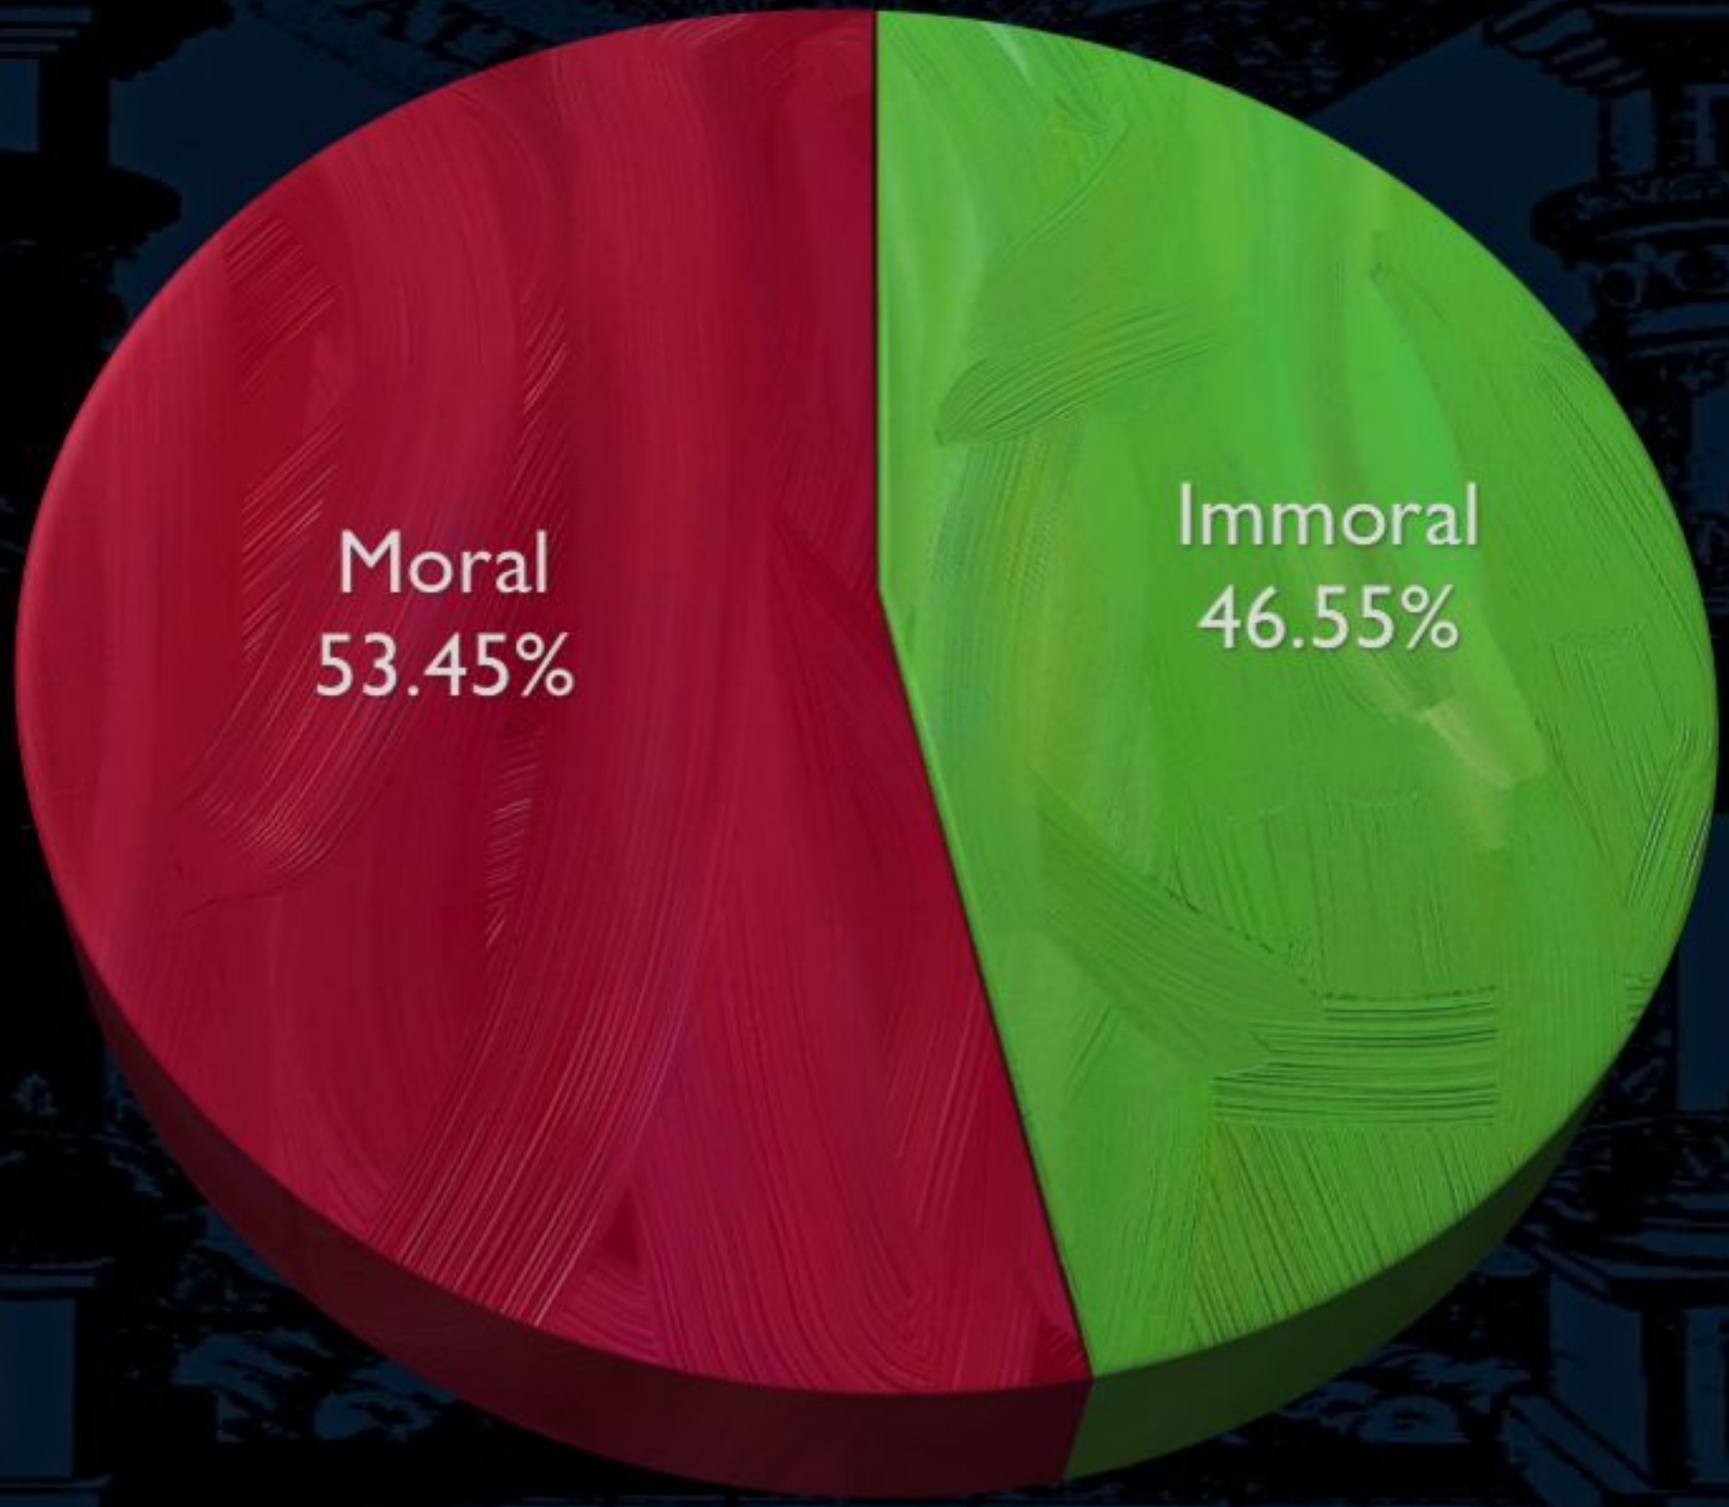
8. Choose the set of statements which *most closely* resembles your own thinking:

A. Taxation is a function of government that is both necessary and moral. Many humanitarian things are done with collected taxes. The quality of human life would suffer greatly if taxes were not collected, so taxation should and must be continued.

B. Taxation is based upon the coercion of a human being's Free Will. All forms of taxation are actually the theft of the product of someone's labor by those who did not earn or create those resources themselves. People pay taxes involuntarily (under duress), because any attempt not to pay them is met with violence or the threat of violence. Taxation is therefore completely immoral and should not be conducted at all.

Response	#	%
A	31	53.45%
B	27	46.55%

8. Is Taxation Moral Or Immoral?



9. Choose the set of statements which *most closely* resembles your own thinking:

A. Drug laws are sensible, necessary and moral. Certain substances are off-limits for human consumption for a good reason. If we made all drugs legal, people would go crazy taking tons of drugs, and society would fall apart in short order. Therefore, laws prohibiting the possession and use of illegal drugs should and must stay in effect.

B. All drug laws are claims that what a person puts into their own body is not their decision to make. This ultimately constitutes a claim that a person's body is not theirs to do as they choose with it, even if they are hurting no one else as a result. Such a claim of ownership upon another person's body constitutes a form of Slavery. Therefore, all drug laws are based upon coercion of Free Will choice and are immoral.

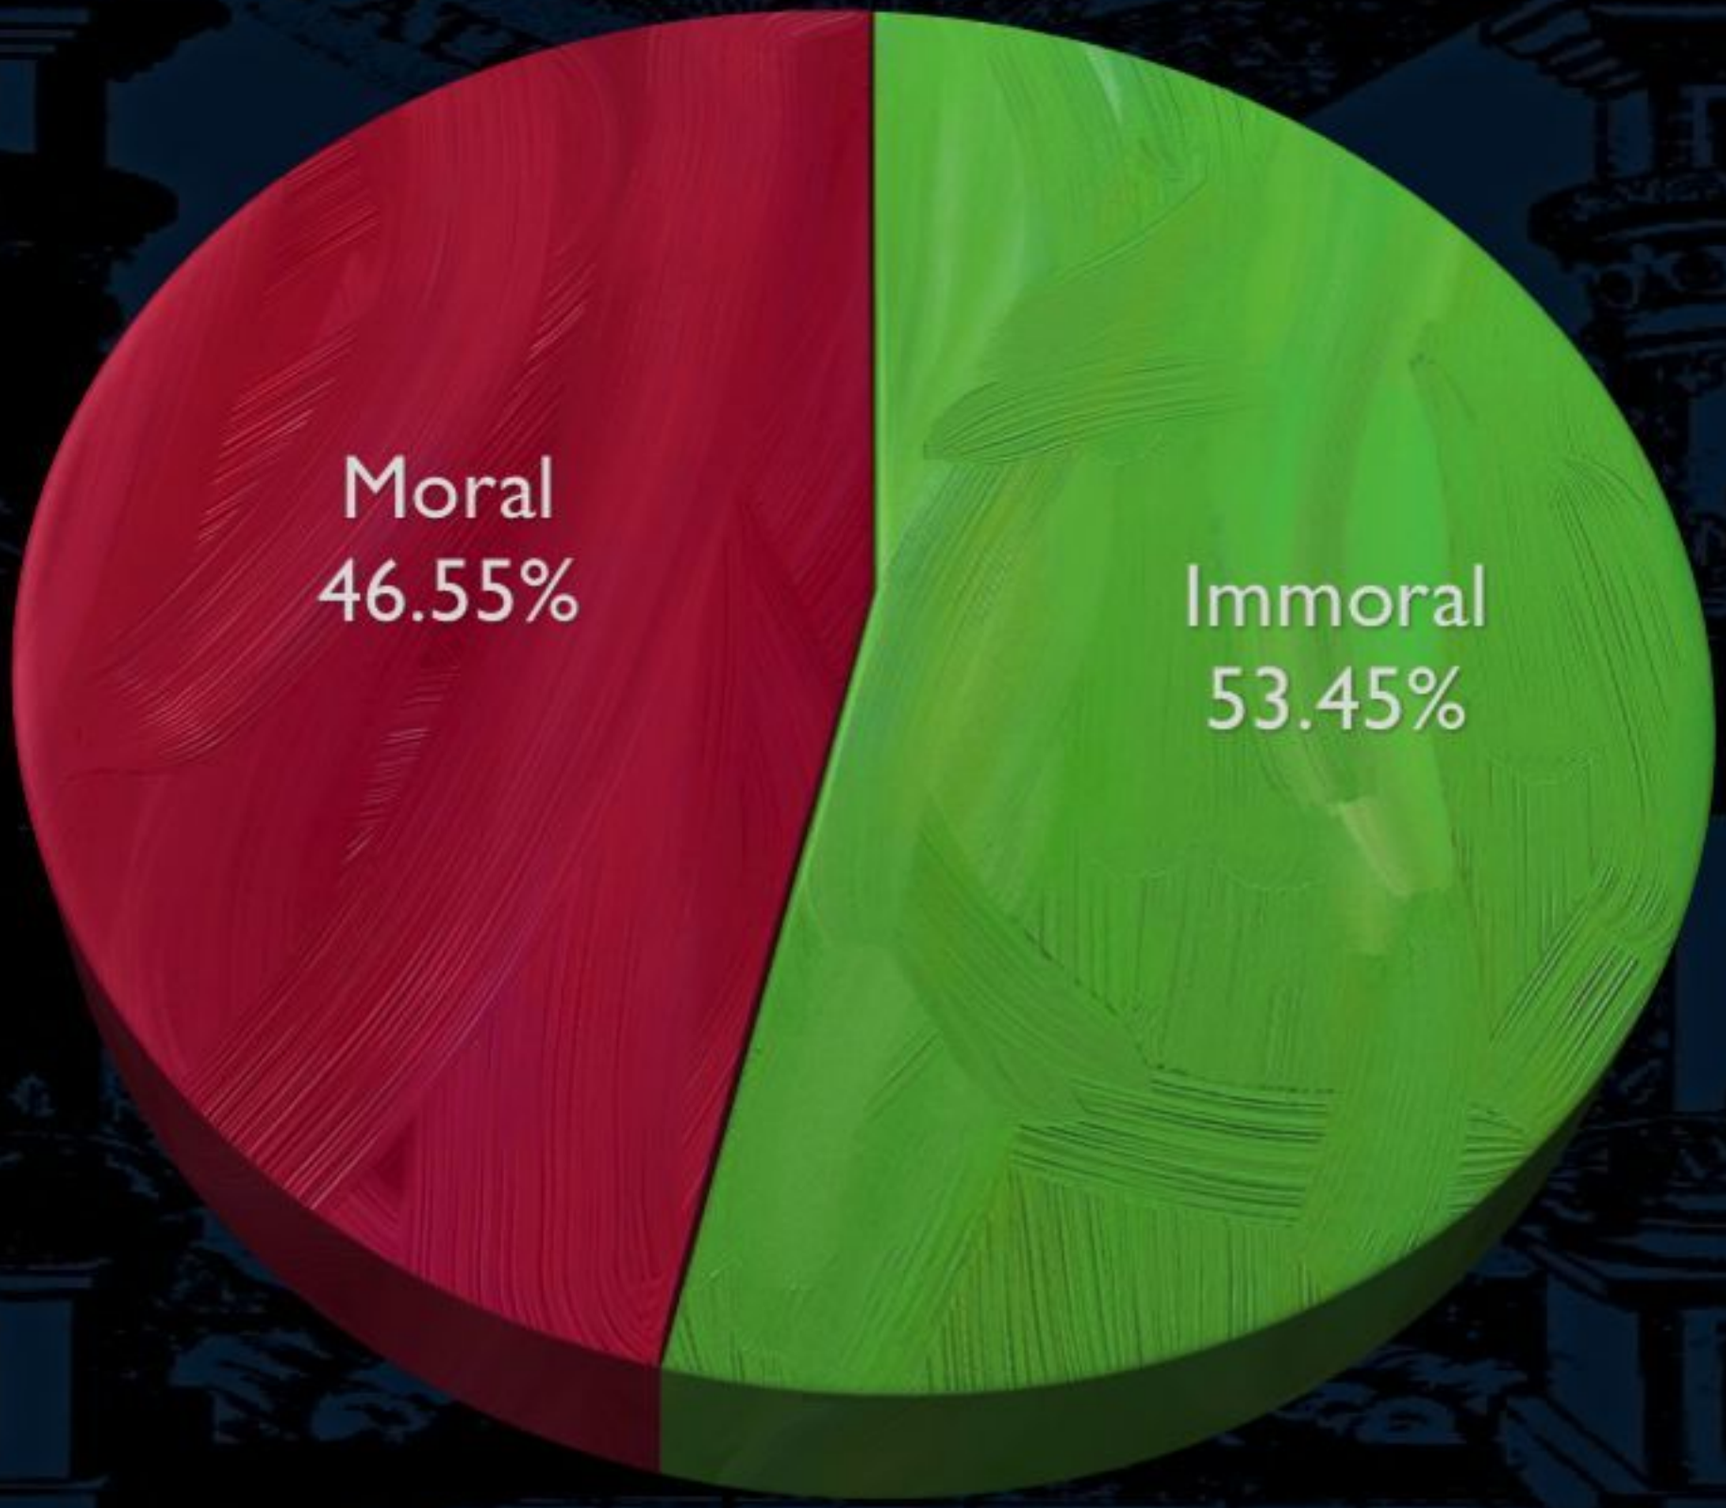
A	27	46.55%
B	31	53.45%

9.Are Drug Laws Moral Or Immoral?



10. Choose the set of statements which *most closely* resembles your own thinking:

A. Driver's licenses are necessary and moral. Driving a car is not a Right; it is a privilege granted to people by the Department of Motor Vehicles and the Department of Transportation. If people drove cars without driver's licenses, there would be total chaos on the roads.

B. Traveling upon the Earth, whether on foot, horseback, boat, car, or any other means is a human Right, not a privilege. Licenses are another way of saying that you need permission from someone before you may do the action being licensed. A certain group of people cannot claim that THEY are in charge of who may or may not take an action which is a human Right. Driver's licenses are ultimately a form of coercion and extortion, forcing people to beg permission and pay money to be allowed to exercise a Right, and are therefore immoral.

B	16	27.59%
